TEN THOUSAND FISH RECEIVED FOR LEE'S LAKE

Granite Mountain Club Prepares for Rare Angling Sport

(From Saturday's Daily)

After several months of correspondence between the Granite Mountain Outing club and the National Fish commission of Washington on the subject of stocking Lee's lake with fish, a consignment of 10,000 of the finny tribe reached Prescott Thursday night and were at once taken to that pond and placed in it.

The species is known as the blue Illinois cat, and varied in size from an inch to two and one-half inches. Of the consignment a few died on the trip from Denver, where the government maintains a western distributing agency. This variety is adapted to lake waters, and it is the prevailing opinion that in a short time their growth will be sufficient for use. They are a very prolific breed, and are preferred for edible purposes to any other excepting the trout, and are also rated as of the gamiest kind of the piscatorial family.

The consignment received was taken to the lake by Dr. H. T. Southworth, H. D. Aitken, C. T. Joslin and Dr. R. N. Looney in their automobiles, each carrying a shipment.

The lake where they are to be propagated is under lease to several parties in this city, and it is regarded as one of the attractive sporting centers of this section. By adding the pleasures of fishing to its winter pastime of duck shooting, it will hereafter be a continuous round of pleasure, and in addition to these features it is situated on one of the finest roadways in the territory for automobiling. In short, this lake that now covers a water surface of over 160 acres, with fine club houses for the accommodation of shooting parties, it is an ideal resort and is much sought after by many who have lately visited it.

In a few days hence another heavy shipment from the National Fish commission is expected to reach the Verde river in the shape of 15 tanks of spawn from Leadville, Colo., of the famous Rocky Mountain trout family. They will be placed in that stream above Cottonwood, where the water is cool the year round, it being the intention of several Jerome sporting men to have recreation in the line of fishing there as well as hunting game and fowl. It is also probable that a consignment will be placed in Oak creek, that place being frequented by hundreds each season.

With the Lee lake consignment a stock was sent to the Grand Canyon, where many pools are in existence along the Colorado at a point below where the Hotel El Tovar is situated.

The placing of an auto-launch, it is said, will be the next move made for Lee's lake.
